EDUCATION

VIT Bhopal University

Jul 2021 – May 2025

B.Tech in Computer Science Engineering — CGPA: 8.28/10.0

SKILLS

- **DevOps and Cloud:** AWS, Azure (AKS, Key Vault, SPN), Docker, Kubernetes, Terraform, Ansible, CI/CD(Jenkins, GitHub Actions)
- **Programming:** C++, Python, SQL, Dart (Flutter)
- **Monitoring and Observability:** Grafana, Prometheus, ELK Stack, CloudWatch
- **Databases:** MySQL, NoSQL

WORK EXPERIENCE

Solytics Partners, Pune

May 2025 – Nov 2025

DevOps and Cloud Consultant

- Migrated Jenkins pipelines to GitHub Actions, reducing deployment time from 20 minutes to 6–7 minutes (65% improvement).
- Reduced monthly cloud spend from \$22,000 to \$19,000 (11%) by consolidating fragmented VMs and right-sizing multi-environment workloads.
- Led the end-to-end migration from AWS & Azure to a cost-optimized cloud provider(E2E), setting up complete infrastructure from scratch (compute, networking, Kubernetes, ingress, monitoring, deployments).
- Provisioned and managed production-grade EKS clusters using Terraform (VPC, NodeGroups, IAM roles, Ingress, autoscaling).
- Automated infra provisioning and deployments using Ansible and GitHub Actions, enabling consistent environment rollout.
- Built centralized observability using Prometheus and Grafana, improving service-level monitoring and incident response time.
- Implemented Kubernetes security best practices by managing RBAC roles, ServiceAccounts, and cluster access controls for multiple environments.

Freelance Cloud Engineer, Remote

Dec 2024 – Apr 2025

AWS Infrastructure Automation & Cloud Workflows

- Set up lightweight AWS environments for small teams, including EC2 deployments, IAM policies, S3 hosting, and secure access workflows.
- Built reusable GitHub Actions pipelines for container builds (ECR) and automated deployments to Kubernetes environments.

Aavas Financiers Ltd, Jaipur

Dec 2024 – Jan 2025

Software Engineer Intern

- Optimized SQL queries, which improved performance by 30%.
- Enhanced MySQL schema and indexing for faster execution.
- Built internal dashboards for data visibility, which enhanced decision-making.

CERTIFICATIONS

- AWS Cloud Practitioner Jan 2024 – Jan 2027
- AWS Solutions Architect Associate Mar 2024 – Mar 2027
- NPTEL Cloud Computing Jan 2024 – Apr 2024
- Industrial IoT Markets and Security Jan 2023

PROJECTS

Kubeconfig Generator - Kubernetes Access Automation

2025

GitHub Actions + Kubernetes RBAC / Cloud-Agnostic

- Automated namespace-scoped kubeconfig generation using ServiceAccounts with custom RBAC roles on any Kubernetes cluster (EKS, AKS, GKE, on-prem).
- Created GitHub Actions workflow to provision namespaces, assign admin/readonly roles, generate non-expiring tokens, and publish kubeconfigs as downloadable artifacts.
- Enabled secure, least-privilege cluster access for CI/CD systems and L1/L2 engineers without exposing cluster-admin credentials.
